

# Hydrafacial just at 2499₹

A **HydraFacial** is a medical-grade skin treatment that uses a three-step process to cleanse, extract, and hydrate the skin:

**Cleanse:** The skin is gently exfoliated and resurfaced to remove dead skin cells.

**Extract:** A vacuum-powered extractor removes dirt and oils from pores.

**Hydrate:** The skin is saturated with antioxidants and peptides.

HydraFacials can help with a variety of skin conditions, including: Fine lines and wrinkles, Pigmentation, Acne, Pore size, and Oily skin and congestion.

HydraFacials are considered more effective than a typical spa facial and are designed to improve skin health and appearance for up to seven days. They are non-invasive and practically painless, and can be administered by a licensed esthetician, dermatologist, or plastic surgeon.

# Ultra Therapy just at 1699₹

Ultherapy is a non-invasive, non-surgical procedure that uses ultrasound energy to tighten and lift loose skin and wrinkles. It's FDA approved and is offered by many medical and cosmetic professionals. Ultherapy can be a good option for people who don't want to get a face lift or have a more invasive procedure. There's usually no downtime after treatment, and most people only need one or two treatments. Full results can take three to six months to appear.

# Microneedling just at 1999₹

Microneedling is a minimally invasive skin treatment that uses tiny needles to stimulate collagen production and treat a variety of skin conditions:

## How it works

A healthcare provider uses short, thin needles to create tiny punctures in the skin, which stimulates the body to produce collagen and elastin. These proteins help keep skin firm and smooth.

## Who can get it

Microneedling is safe for all skin tones.

# Laser Hair removal just at 1999₹

**Laser hair removal is a procedure that uses a laser to reduce unwanted hair on the body. Here's some information about laser hair removal:**

## How it works

**The laser beam damages hair follicles with intense heat, which temporarily stops hair growth. The laser vaporizes the hair, which can cause a sulfur-like smell and small plumes of smoke.**

## Results

**Laser hair removal isn't permanent, but it can reduce the number of unwanted hairs in an area. The hair that grows back is usually finer, lighter, and fewer in number.**

# IPL Photo facial just at 2499₹

An IPL (intense pulsed light) photofacial, also known as a Pulsed Light Therapy, is a skin treatment that uses light to improve skin tone and texture. It can be used to treat a variety of skin concerns, including:

age spots, sun damage, rosacea, spider veins, hyperpigmentation, and discoloration.

## Here are some things to know about IPL photofacials:

### Where it can be used

IPL photofacials can be used on the face, neck, chest, arms, hands, legs, and back.

### Treatment sessions

IPL photofacial treatments typically last 20 minutes to an hour, and clients usually get 3 to 6 treatments spaced one month apart.

### Side effects

After treatment, your skin may appear slightly red and swollen. Freckles and sunspots may initially get darker and flake off within one to three weeks.

### Who should perform it

A medical professional should perform the procedure to get the best results and minimize risks.

### Skin tone

Patients with a darker complexion should consult with a medical professional to confirm that IPL is suited for their skin tone.

# Carbon facial just at 2749₹

A carbon laser peel, also known as a photo facial, is a non-invasive laser treatment that can help rejuvenate your skin:

## How it works

A carbon solution is applied to the skin, then a laser heats and vaporizes the carbon, exfoliating the skin and stimulating collagen production.

## Benefits

Carbon laser peels can help with acne, enlarged pores, oily skin, uneven skin tone, blackheads, dull skin, and rosacea.

# Chemical peel just at 1599₹

A chemical peel is a treatment used to improve and smooth the texture of the skin. The skin on the face is most commonly treated, but peels can also be performed on the body. Chemical peels are intended to remove the outermost layers of the skin.

# Vitalize peel just at 1599₹

Vitalize Peel helps fight the effects of time, sun damage, and environmental aging. This powerful yet non-damaging peel can take years off aging skin. This is the perfect peel for patients with mild to moderate skin conditions including fine lines and wrinkles, sun damage, pigment irregularities, and acne.

# Veg peel just at 1899₹

Skin-enhancing compounds: Vegetable peels are chemical-free and contain compounds that can enhance skin.

Dry skin repair: Vegetable peels can help repair dry skin.

Under-eye puffiness: Vegetable peels can help reduce under-eye puffiness.

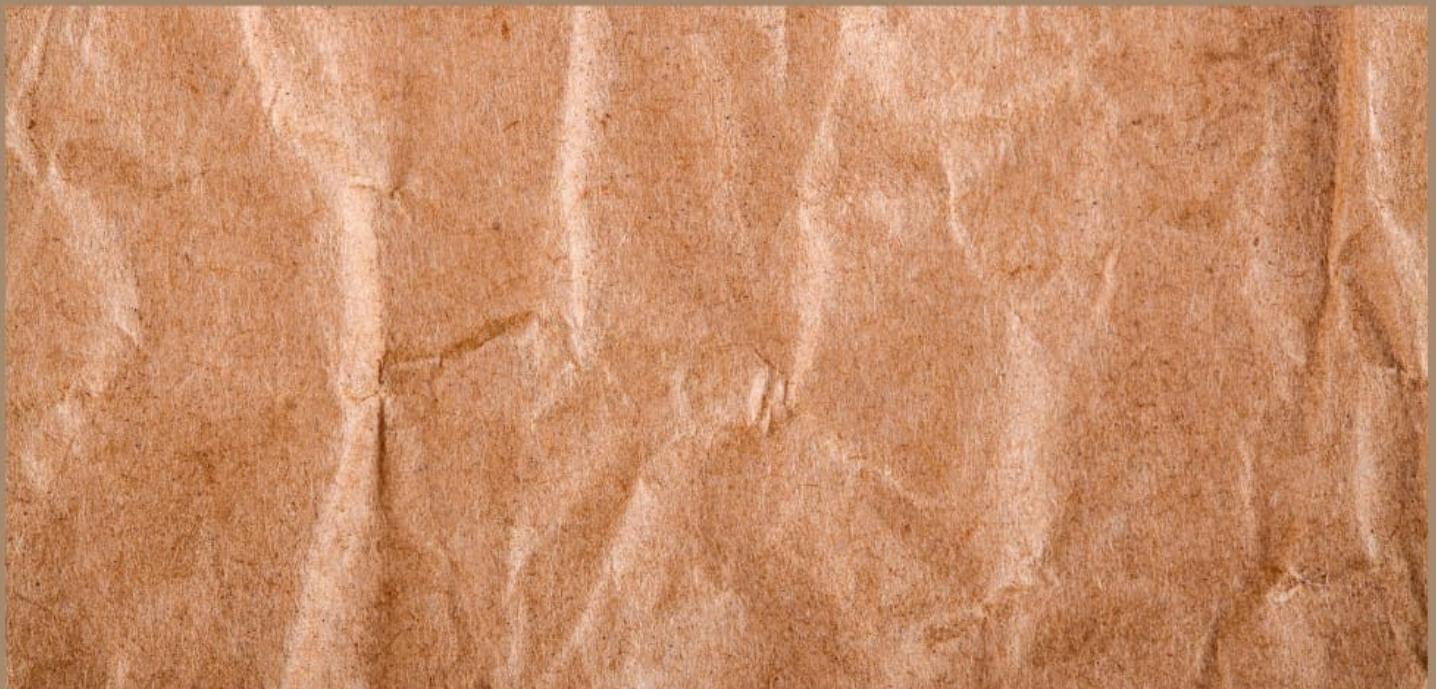

Dark circles: Vegetable peels can help reduce dark circles.

Remove whiteheads, pimple scars, and blemishes: Vegetable peels can help remove whiteheads, pimple scars, and blemishes.

Fairer, glowing skin: Vegetable peels can help give you fairer, glowing skin.

Healthy, radiant skin: Vegetable peels can help lead to healthy, radiant skin.

# Skin texture improvement at 1699₹

Laser treatments can improve skin texture by stimulating collagen production and removing the outer layer of skin:

## Laser resurfacing

Also known as lasabrasion, laser peel, or laser vaporization, this procedure uses a laser beam to remove the epidermis and heat the dermis. This stimulates collagen production, which results in smoother, firmer skin.

# Acne scar removal at just 3549₹

Laser treatment for acne scars uses light to destroy the scar tissue on the top layer of the skin and encourages the growth of new healthy skin cells to replace scar tissue. This treatment won't always get rid of acne scars completely, but it can make them less noticeable and minimise pain.

# Pigmentation removal just at 3549₹

High-energy pulsing lasers can safely and effectively remove many unwanted brown and red spots on your skin, including liver spots, age spots, sun spots, broken capillaries, birthmarks, and angiomas.

# **Birth mark removal just at 1649₹**

When the laser light enters the skin tissue, it is converted into heat and eliminates blood vessels. For birthmarks that are brown or blue, the laser is used to target and decrease melanin, the substance responsible for skin pigment.

# Finalines & wrinkle cure just at 6999₹

There are many ways to reduce the appearance of wrinkles, including prescription creams and serums, Botox injections, chemical peels, facial fillers, laser resurfacing, and face-lifts.

# Sun damage cure just at 2699₹

Laser therapy can be used to treat sun damage, including brown and red spots, on almost any part of the body. Different types of lasers can address different concerns, such as fine lines, brown spots, and enlarged pores. Laser treatments can take less than 30 minutes, but downtime depends on the type of laser used.

# Skin tone improvement at 1749₹

Laser treatments can improve skin tone and texture in several ways:

## Laser skin resurfacing

Also known as a laser peel, this procedure removes the outer layer of skin, called the epidermis, and heats the underlying dermis. This stimulates collagen production and the growth of new skin, which can make skin appear tighter and younger. Laser skin resurfacing can help with wrinkles, age spots, sunspots, redness, rosacea, and acne scarring.

# Anti puffiness & face lift just 3499₹

## How it works

HIFU uses ultrasound to heat skin at a deep level, damaging skin cells and stimulating the body to produce collagen. Collagen is a substance that gives skin structure and elasticity.

# Excimer Vitiligo just 3999₹

Excimer lasers are a type of UV laser that can be used to treat vitiligo, a condition that causes patches of skin to lose color. The laser is used to focus UVB light on the affected areas of skin, which may stimulate repigmentation and restore color.

# Malasma removal just at 2999₹

Intense pulsed light (IPL) laser uses a broad spectrum of light wavelengths to target hyperpigmented areas directly. The light pulses heat and destroys melanin to remove discoloration and restore a more even complexion.

# Laser helmet just at 2499₹

Red light therapy is a form of LLLT, also known as photobiomodulation. It uses light of specific wavelengths to stimulate your hair growth.

# Oxygeneo at just 1999₹

Oxygeneo is a non-invasive facial treatment that uses oxygenation, exfoliation, and infusion to rejuvenate your skin. It's safe for all skin types, ages, and ethnicities.

# Skin tightening just at 2499₹

Skin tightening machines use a variety of technologies to stimulate collagen and elastin production, which can help firm up sagging skin.

Via - RF, Microwaves, Ultrasound etc

# Skin rejuvenation just at 4799₹

Skin rejuvenation machines use a variety of technologies to treat signs of aging, improve skin texture, and promote overall skin health. They can help with:

Wrinkles and fine lines

Skin rejuvenation machines can reduce the appearance of wrinkles and fine lines, pigmentation, collagen production, skin texture, Acne scares, open pores & skin products absorption.

# Open pores cure just at 1699₹

Lasers boost the skin's healing process by stimulating collagen and elastin production. These two will effectively minimize the size of open pores caused by the ageing process and give your skin a smooth and fresh look. And the results are long-lasting with just two sessions of laser resurfacing.
